

HW1- Warren montes

1.3)

1. an experiment involves tossing a coin 3X.
What is the sample space of this experiment?

H-heads T=Tails 3 coin tosses $\Rightarrow 2^3 = 8$

or

$S = \{HHH, \underline{HHT}, \underline{HTH}, \underline{HTT}, \underline{THH}, \underline{THT}, TTH, TTT\}$

2.

3 outcomes w/ two heads

3. From S , $A \cup B = \{HHT, HTH, THH, HTT, THT, TTH\}$

AND would require 4 Tosses $\therefore A \cap B$ does not exist
